SUMMARY

Passionate computer science student with skills in creating practical and user-friendly web and mobile apps. Also, a speaker at Google Developer Student Club, where I help others learn and collaborate on Android development.

EDUCATION

M S Bidve College Of Engineering — 2020 - Present
B.Tech in Computer Science - CGPA 7.4/10

Dayanand Science College, Latur — 2018 - 2020
Higher Secondary Education - 66 %

New High School, Parli-V — 2018
Secondary Education - 94.60 %

SKILLS

Languages:	C++, Python, Dart, JavaScript
Databases:	MongoDB, MySQL
Frameworks:	Flutter
Technologies:	Git, Github

PROJECTS

Student Registration System 🔗

- Made interactive UI to enhance the experience of the user using Python libraries.
- Ensure data security and integrity using MySQL.
- Reduced duplicacy and redundancy of data by using appropriate algorithms.

WallpaperHub 🔗

- Wallpaper Hub streamlines wallpaper selection with diverse categories, utilizing
- Pexels API for easy access to a variety of wallpapers. Efficient display powered by a map data structure enhances application speed and responsiveness.
- User-friendly UI includes categorized wallpapers, direct downloads,a gallery preview with a search bar and easily scrollable tiles for efficient browsing.

QuickRecords 🔗

- QuickRecords, a Flutter-based app, streamlines transaction tracking via Google Sheets, simplifying user financial management.
- Efficient data handling via shared preferences and map format reduces time complexity during the transfer of user transactions to Google Sheets.
- Enhanced user experience with an intuitive interface, featuring a ListTile view for concise data preview and a clear snapshot of total transactions.
